

# Local Anaesthesia Certification Course for Dental Hygienists

Designed for working dental hygienists that require certification in local anaesthesia as a condition of their licence, this course provides both didactic and hands-on instruction for the use of local anaesthetics by the dental hygienist. Eligible participants must hold a recognized diploma or degree in dental hygiene. Upon successful completion of this program (which will include both written and clinical evaluation) you will be eligible for a change in registration status by the College of Dental Hygienists of British Columbia. Our goal is that upon successful completion of this course, you will have the confidence and knowledge to safely, effectively and comfortably administer local anaesthetics for dental procedures.

## Course description

This course will be delivered in Victoria, BC over two weekends. You will be given classroom and clinical instruction as well as time to practice the techniques. Participants will both deliver and receive local anaesthetics in partners in the clinic sessions. During the clinical practice component (3 weeks between the 2 weekend sessions), you will be expected to practice your technique under the observation of a licensed dentist.

### Space is limited

Registration deadline is  
Sunday August 22, 2010

Please fax or mail registration form  
(on back) by deadline
