

How to log on to the intranet from home

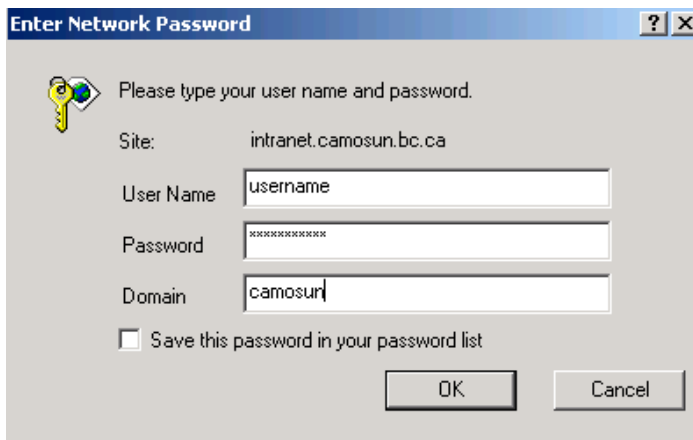

Go to intranet.camosun.bc.ca

Depending on the operating system you are running off campus, you will get one of two pop up boxes. Below is the difference on how to log on based on each operating system. The username you use is the same one you use to log on to your computer at your work station. Same applies for the password.

Windows 98 and XP only have two boxes. Below is how to enter your username/password/domain

Windows 2000 and ME have three boxes, and this shows the difference in how you enter your username/password/domain.

If you follow these instructions based on your own personal operating system, you should have no problems logging on.

If you still have problems, please call the support desk at 370-3064 or email support@camosun.bc.ca
