Upon successful completion of this course the student will be able to:

1. Identify and describe the anatomical structures and components of the musculoskeletal, respiratory, cardiovascular, digestive, and urinary systems using X-ray images and a variety of media.
2. Describe the functioning of the musculoskeletal, respiratory, cardiovascular, digestive, and urinary systems as it pertains to radiographic imaging.
3. Relate structure to physiological function of the musculoskeletal, pulmonary, and cardiovascular system as it pertains to radiographic imaging.
4. Identify and describe anatomical features of the skeleton to facilitate accurate radiographic positioning.
5. Identify and describe the relationships and movements of skeletal structures and joints to facilitate accurate radiographic positioning.

Reading Quizzes	10%
Midterm Exam 1	25%
Midterm Exam 2	25%
Cumulative Final Exam	40%
TOTAL	100%

Reading Quizzes

In order to gain the most from lectures, students should come to class prepared. This means having done the assigned reading beforehand. In order to assess your understanding of the material, there will be a short 5-10 question reading quiz at the beginning of class that covers the general concepts addressed in the readings.

Midterm Exams

There will be two midterm exams to assess your level of knowledge as it relates to the theory of Anatomy & Physiology for Radiographers. The purpose of the midterm exams is to provide you with feedback about your level of knowledge **during** the term. The midterm exams are non-cumulative. Beyond a grade, I encourage you to use the exams as an assessment **for** learning, not simply **of** your learning. As such, I highly encourage you to reflect on your results by identifying areas of weakness and celebrating successful integration of knowledge. The midterm exams should provide confidence, decrease anxiety, and expose you to the type of questions you can expect on the final exam.

Final Exam

The final examination is cumulative and includes material from all modules covered in the course. This final examination will occur during the regularly scheduled final exam week. In emergency circumstances, a student may write a test or final examination before or after the scheduled time if the student would otherwise be unable to complete the program or course. Exceptions due to emergency circumstances, such as unavoidable employment commitments, health problems, or unavoidable family crises, require the approval of the instructor. Holidays or scheduled flights are not considered to be emergencies. The student may be required to provide verification of the emergency circumstance. Camosun Academic Policy retrievable from: <http://camosun.ca/learn/calendar/current/pdf/academic-policies.pdf> Missed quizzes or examinations cannot be made-up except in the case of documented illness (doctor's note).

6. Grading System

- Standard Grading System (GPA)
- Competency Based Grading System
