TEAC 105 EXPLORES THESE FOUR TECHNOLOGIES THROUGH HANDS-ON ACTIVITIES AND PROJECT-BASED LEARNING!!!

WHAT WOULD YOU LEARN?

Civil Engineering	Identify various civil engineering projects and the role that civil engineering plays in each. Apply civil engineering methods and calculations to a simple design and civil engineering project.
Mechanical Engineering	Demonstrate simple 3D CAD modeling skills, basic shop skills and safety techniques, and identify the design elements associated with the completion of a small mechanical engineering project.
Electronics	Create a simple electronics circuit, describe simple microcontroller programming concepts, and list the elements of and build a small electronics project.
Computer Science	Use a programming language to examine the fundamentals of software design and development.
