Sustainability Score Card 2012

Sustainability Performance

From agreement	Measure of success	Results 2009-10 September 2009 – June 2010	Results 2010-11 July 2010 – May 2011	Goal for YE 2012 Change Dates to Match College Fiscal April 1, 2011-March 31, 2012	Results April 1, 2011 – March 31, 2012	Goals for YE 2013
Incorporating an increasing level of local food sourcing; Local – <i>defined as BC</i>	Ordering local preferentially Produce: Per cent of total produce purchases that are local; Dollar volume spent on Local produce	PRODUCE – order local when available / appropriate (cost / quality); working with new distributor to establish "LOCAL" codes for all produce to allow for better eye to local produce, should be in place for September start up. Estimate that "Island Grown" produced purchased represents aprox 16-22% of Total produce purchases. BC produce represents aprox 79% of total produce purchases.	Our new contract with Sysco allows us to "look for Island first" which should encourage us to order Island Grown more frequently as it will be easier to find. Current 2010-2011 percentage for Island Grown is 24.8%. Current 2010-2011 percentage for BC produce is 83.9%	Increase local purchases and ability to track them through our suppliers.	Contract with Sysco Victoria allows us to "Look for Island First" Current Island Grown is 23.5% Years average for Island Grown 27.8% This will change seasonally. Current percentage to BC produce is 74.9% Yearly percentage is 84.8%	Maintain or improve
	Bakery: Per cent bakery from local bakery / processor; identification of products Protein: in development –	 BAKERY: 90% bakery products baked / processed in Victoria. 95% processed in BC. PROTEIN: All our Beef is now 100% Canadian Beef. Working with Processors to allow for production location 	This percentage has not changed. We			

	ian focus b E fi c	racking. An Example would be that more than 80% of BC Beef is shipped to Alberta from processing. We are challenging our suppliers to ook for a more local processor.	continue to purchase most of our bakery products from a local bakery.	Maintain or increase local baked product purchases	This percentage has not changed. We continue to purchase most of our bakery products from a local bakery.	Maintain
Volume dairy p	Products: products: products ses (dollar or kg) y l f f f	<i>FLUID DAIRY</i> : 8614 litres of local milk = \$14, 200 in purchases and 7900 L of ocal BC cream = \$18,600 n purchases from Sept 2010 o June 2011. Fluid Milk is 100% BC Product and Island product would be 37% <i>CHEESE / YOGOURT</i> -\$39,000 spent on Canadian Cheese; \$6300 on Canadian Cheese; \$6300 on Canadian yogurt. Yogurt would be 100% BC Product - 37% Island product. Cheese purchases were 4 % Island products, 63% Canadian Cheese.	The transition to 100% Canadian Beef has been successfully implemented. We currently are continuing to work with suppliers for more of this product to be processed in BC. We have no figures that show what percentage of the beef is BC raised.	Maintain Canadian Beef levels. Continue to work with suppliers to increase BC processing rates.	We continue to purchase only 100 % Canadian Beef. We have now switched to Canadian Poultry products 61% of which is "BC Grown" We continue to challenge our suppliers to source BC processing plants	Maintain percentages work to improve local processing
			8919 litres of local milk were purchased in 2010-2011 thus far.		After more research it was discovered that with	

Shell and Liquid Eggs – Cage Free / Local Supplier	EGGS – all shell eggs are BC raised cage free 100% shell eggs are Island Raised. Liquid Eggs are 100% BC cage free raised	Total purchase of \$15965.00 8391 litres of local cream Total purchases of \$ 31801.00 Fluid milk and cream is 100% BC Product as we currently purchase from both Dairyland and Island Farms, percentages of Island Milk varies from 28%-37% depending on which Dairy we purchased from. Cheese / Yogurt \$42160.00 spent on Canadian Cheese. Cheese purchases are 11% Island Cheese, 87% Canadian Cheese. \$ 7983.00 on Canadian Yogurt. Yogurt is 100% BC product and depending on the Dairy we purchase from 28%-37% Island Yogurt	Complete switch to 100% Island Farms liquid milk, yogurt, and cream. Focus on increase of BC Cheeses.	Islands Farms now being owned by Saputo, it actually gets less milk from the Island than Dairyland. So based on price we have chosen to continue with Dairyland products. 9267 litres of local milk were purchased between April 1, 2011 and March 31, 2012. Total \$ 16462. 9314 litres of local cream, total \$ 39856. Cheese / Yogurt \$ 43968 spent on Canadian Cheese and Yogurts. Island Cheese purchases are 9% (due to several recalls and health warning this year on Island Cheese) and BC Cheese products average 91% this year. \$10012. spent on 100% BC produced Yogurt. Just over 5000 container this year. Aprox Island grown based 37% on Dairyland / Island Farms percentages of Island Purchases.	Maintain or improve if supplier allows Maintain or improve as supplier allows
		Over 19345 local eggs served. 100% shell eggs are Island Raised. Liquid Eggs are 100% BC cage free raised	Maintain standards for cage free eggs	Served aprox 20997 local eggs.	

					100% shell eggs are Island Raised. Liquid Eggs are 100% BC cage free raised	Maintain standard
From agreement	Measure of success	Results 2009-10 September 2009 – June 2010	Results 2010-11 July 2010 – May 2011	Goal for YE 2012 <mark>Change</mark> <mark>Dates to Match College Fiscal</mark> April 1, 2011-March 31, 2012	Results April 1, 2011 – March 31, 2012	Goals for YE 2013
Competing effectively with local area restaurants by providing high levels of food quality, creativity, variety including branded concepts for its diverse community;	Student feedback; College survey results;	Competitive pricing based on neighborhood analysis; Menus adapted based on student feedback; Deal with any complaints effectively and in timely manner	Competitive pricing based on neighborhood analysis; Menu adjustments made in response to student feedback Deal with complaints effectively in a timely manner	Continue to strive for cost controls. New rotational menu's to freshen choices	Refreshed Menu's in Sept with a local focus. Added Gluten Free to By The Books as well as Salad Bar at Campus Caf	Continue to strive for cost controls to allow for "best Quality" approach. Refresh menu's by following trends and customer comments
Providing and promoting nutritious food for the diverse community;	Selection and identification of healthy choices; Availability of nutrition information	Nutritional information available; Signage identifying healthier alternatives, Highlight local fruits and vegetables; Promotions include nutritional info / healthy choices (e.g. selections under 500 Calories or 10 grams of fat); Minimum 10 vegetarian items on menu daily	Increased nutritional information available. Increased local purchases and healthy choices. Introduced a gluten free line. Introduced brown rice sushi. Introduced local direct fair trade coffee.	Increase signage for local and nutritional information. Label "choice" alternatives like vegan.	Nutritional Information available on all products sold. "I Buy Local" signage at both Campus Caf and Urban Diner	Increase nutritional awareness Increase knowledge of "Buy Local" practices

Partnership Earth- Our Commitment 5.3.4, 2 a)

2. Sustainability Commitments: Waste Reduction

The Contractor understands that dining services is a major consumer of utilities, packaging products, chemicals and paper goods. Waste will be reduced, reused and recycled. From glass, cardboard, and Styrofoam recycling to biodegradable service-ware and composting, The Contractor will manage a disposable packaging and reducing waste program.

a) "Partnership Earth - Our Commitment®" The Contractor's "Partnership Earth – Our Commitment ®" is an environmental program that will deliver on this commitment. The program includes:

From agreement	Measure of success	Results 2009-10	Results 2010-11	Results for YE 2012	Goals for YE 2013
Environmental Committee: the Contractor will become an active member of College (CCSEA) and other local committees supporting environmental and social sustainability. The Contractor will work with faculty, administrators, students and student groups such as ENSU, GESA, OPIRG, SAC, EPAC, and others who work for environmental causes work together to provide a stronger voice in promoting environmental awareness on campus.	Active participation on committees or with students / student groups	Meet with environmental students / interested students; Always keen and open to participate in any committees where appropriate; Will work with campus community to identify which groups would like foodservice participation and in what capacity	Member of JOSH	Maintain or increase involvement	Maintain or increase involvement
Composting: The Contractor will, with the advice and direction of the College, separate food preparation garbage to be used in composting.	Separation bins with Directive signage in foodservice areas; Diversion of organic waste front and back of house; Staff training conducted Volume of organic waste diverted (if possible to collect number from hauler – Refuse)	Kitchen food scraps and compostable waste is separated and diverted to organic stream Composting bins also available in foodservice areas front of house for post consumer food / compostable waste Will work with custodial / facilities staff, hauler and Camosun to identify feasibility of measuring organic waste Estimate can be provided if desired.	maintained	Maintain Continues to be available but not properly used by consumers Physical Resources do not have ability to do this with any accuracy at this time	Work towards greater awareness and proper usage of bins
Kitchen waste programs including recycling of cooking oils and raw waste materials will be implemented.	Implementation and documentation of program	Kitchen waste programs does include collection of cooking oil and diversion for processing for bio diesel grease traps are cleaned and waste is recycled as well.	maintained	Maintain Bio fuel now on both campuses	maintain
Food Service packaging will be reduced and eliminated where possible. One of the criteria for the Contractor's supplier selection will be a commitment by each of the suppliers to reduce source packaging.	Streamlined packaging; purchase bulk; recycle where possible	Supply chain continues to work with suppliers to ensure more efficient packaging solutions; Packaging programs have been developed to help emphasize environmental attributes –e.g. compostable, recyclable, made from	Supply chain continues to work with suppliers to ensure more efficient packaging solutions; Packaging programs have been developed to help emphasize environmental attributes –e.g. compostable,	Ongoing Maintained.	On going, maintain or improve

From agreement	Measure of success	recycled content; Bulk purchasing helps reduce waste e.g. for condiments, grains etc.	recyclable, made from recycled content; Bulk purchasing helps reduce waste e.g. for condiments, grains etc. Deliveries are only accepted if packaged in recycled or recyclable packaging. No Styrofoam is accepted. Results 2010-11	Results for YE 2012	Goals for YE 2013
Environmentally friendly packaging and paper products will be utilized where possible and as more become available. Bulk condiment dispensers will be provided to minimize individual packaging. The Contractor will abide by Camosun's Waste Management Policy and participate in the established procedures for waste management.		2009-10New express program implemented for Sept will further emphasize environmental attributes including conversion to #1 PET plastic – the most recyclable plastic; compostable products and products made from recycled content (recycled PET); Paper products – napkins etc are EcoLogo certified and made from 100% recycled contentWe purchased over 117,500 units of biodegradable packaging last year including plates, bowls, takeout containers, cups and an additional 12000 pieces of biodegradable cutlery from Sept 2009 to June 2010.	Compostable plates, takeout containers; soup bowl and coffee cups provided Pet plastics in place, napkins in place We purchased over 118,150 units of biodegradable packaging last year including plates, bowls, takeout containers, cups and an additional 11800 pieces of biodegradable cutlery from July 2010 to July 2011. 88% of our paper products are compostable. 98% is biodegradable.	Maintain or increase levels of "green" packaging We purchased over 136,128 units of biodegradable packaging last year including plates, bowls, takeout containers, cups and an additional 18156pieces of biodegradable cutlery from April 1, 2011 to March 31, 2012 91% of our paper products are compostable. 98% is biodegradable.	Strive for increase in green packaging

From agreement	Measure of success	Results 2009-10	Results 2010-11	Results for YE 2012	Goals for YE 2013
A WHMIS program will form an integral component the plan. Working in conjunction with Camosun's Physical Resources Department, Energy Conservation Programs within the food service operation will be implemented.	WHIMIS Training for FLE's; Employee On boarding training program	WHIMIS and on boarding training conducted annually to also include health and safety, energy and water conservation; and other ARAMARK training programs	WHIMIS and on boarding training conducted annually to also include health and safety, energy	Annual and on boarding WHIMIS and FoodSafe for each employee including management. Management took part in several training programs including conflict management, employee relations, teambuilding, time management, and production management	Maintain
Cleaning and Sanitation: Cleaning solutions and chemicals used for cleaning and sanitation within the foodservice areas will be environmentally friendly where reasonably possible and available.	Documentation of Green Cleaning products / program	We have implemented Ecolab's Ecologic product line that include green seal certified products (floor cleaner, and soon to be transitioned all purpose cleaner) and greener alternatives (ware washing)	maintained	maintained	Maintain
Additional Food Waste Reduction Strategies: Reduction of food waste is directly related to avoiding over production of menu items, and will be achieved through utilizing the Contractor's Food Production program.	Production sheets / Pars ensure not overproducing; Use of leftovers; Menu planning based on feedback; Just in time cooking balanced with batch; Review leftovers and garbage and adjust menus	We operate using production sheets to ensure not overproducing; Leftovers are used appropriately so as to reduce waste: Menus are developed based on customer feedback and requests; Just in time cooking balanced with batch to help meet demands and reduce waste / leftovers; Daily we assess leftover products and waste and adjust menus accordingly	Maintained and improved. Waste was reduced 1% over last period.	Maintain or improve. Increased waste reduction by 19% (due mostly to program through Level Ground)	Increase waste reduction where able
