

COMMUNITY ENGAGEMENT

Providing students with opportunities to make a connection and contribution to the college community, through their coursework, provides them with a valuable experience of community connection.

Suggestions:

1. Provide opportunities for students to choose assignments that can be incorporated into [and possible showcased at], a campus initiative or through a community club.
2. Suggest students participate in extracurricular involvements on campus and in the greater community [e.g. peer programs, clubs, and service learning opportunities]
3. Encourage students to get involved in campus-based mental health promotion activities. [Eg. De-stress Fest]
